PROJECTSasdf

Flipcamp (Ruby on Rails, JavaScript, React, Redux, HTML5, CSS3, Webpack, PostgreSQL)   [Live Site](#) | [Github](#)
A site clone of Hipcamp.com
- Managed scheduling and booking CRUD through custom database operations using Active Record and PostgreSQL
- Harnessed the unidirectional state management of Redux to simplify React components and directly manage data for form input
- Implemented custom back and front end modal-based user authentication by combining Rails conventions, Active Record, and customized React-Router higher order components

Camplist (JavaScript, Node, Express, React, Redux, HTML5, CSS3, Webpack, MongoDB)   [Live Site](#) | [Github](#)
Search and share found spots on BLM land
- Adhered to React and ES6 best practices to generate a true single page reactive web app experience
- Implemented an interactive map to allow fluid waypoint finding and site-specific location marcations
- Incorporated React-Redux container and Redux selector patterns to architect highly scalable and uni-directional front-end state management, including custom search functionality

TowerTime (JavaScript, Canvas, HTML5, CSS3)   [Live Site](#) | [Github](#)
A tower defense game built entirely on canvas
- Built out fully featured web game, including an implementation of Dijkstra's algorithm with the A star pattern for path-finding
- Optimized game logic for a balanced and exciting user experience, including custom pixel animations and in-game hotkeys
